=520 3\La s{acute}ecurit{acute}e hydrique au Canada est-elle assur{acute}ee? Selon Environnement Canada, le quart des collectivit{acute}es canadiennes ont {acute}et{acute}e affect{acute}ees par une p{acute}enurie d'eau au cours de la deuxi{grave}eme moiti{acute}e des ann{acute}ees 1990. La qualit{acute}e de l'eau dans plus d'un millier de petites collectivit{acute}es rurales est jug{acute}ee m{acute}ediocre ou m{circ}eme pire que dans les pays en voie de d{acute}veloppement. En outre, au moment de la r{acute}edaction de ce document, un avis d'{acute}ebullition de l'eau est maintenu en vigueur en tout temps dans plus d'une centaine de collectivit{acute}es des Premi{grave}eres Nations (Phare 2009). Le sous-investissement dans les r{acute}eseaux de traitement de l'eau au fil des derni{grave}eres d{acute}ecennies a eu des cons{acute}equences n{acute}efastes partout au pays.

=520 3\\\$als Canada's water secure? According to Environment Canada, one quarter of all Canadian communities experienced water shortages during the latter half of the 1990s. Water quality in over a thousand

small and rural communities is as bad as or worse than that in many developing countries. Likewise, at the time of writing, more than 100 First Nations communities live with permanent boil water advisories (Phare 2009). Across the country the effects of decades of under-investment in water treatment networks are now apparent: over the next two decades, Canada's aging water networks will have to be replaced at the cost of an estimated
